

ASZEL30 LED LIGHT

ISZ-LED-L30

The ASZEL30 LED is powered by either 2 AA batteries (Purchased Separately) or by the AQ51000 Power Supply (also purchased separately). This LED has 7 different colors and 4 different combination settings. This LED also has a timer selection (Slide) switch which simplifies the timer operation. Please follow the instructions below on how to set your LED color of choice or activate or de-activate the timer.

The Large Blue Button controls the colors and combination settings. Each consecutive press of the button changes color or setting. There are 11 choices plus an off position. Colors of choice are: White, Blue, Green, Red, Turquoise, Violet, and Yellow. There are 2 auto switching color settings, 1 white light fade in and out, and 1 sequential color fade into the next setting.

If at any time you wish to turn the light off just press and hold the blue button for 1.2+ seconds.

The Slide Switch for the Timer (located on the bottom of the housing): Note: The LED Light will stay on unless one of the timed switch settings is activated. There are 3 switch settings:

4H (4 Hour Duration) = switch setting slide left,

2H (2 Hour Duration) = switch setting slide in center,

0H (Timer Off - LED Stays On) = switch setting slide right.

The Timer Setting will repeat every 24 hours until the unit is turned off, or the power supply is disconnected, or the batteries are drained of enough power to support the system. This allows you to set the timer at a particular time of day - for example: 8pm - and the light turns on at 8pm every day to the length of time you set (2 hour or 4 hour). You must **physically** turn the light on at the time of day desired and when activated the unit will come on and then turn off at that time each subsequent day until the unit is turned off or the power supply is removed. **To fully utilize this feature we highly recommend attaining the appropriate power supply listed above and using it rather than batteries because batteries do run down over time.**

If you are looking for a retail outlet to purchase any of our great aquarium kits or optional items please call or email using the information below and we will be more than happy to provide help.

IF THIS COMPONENT DOES NOT FUNCTION PROPERLY OR YOU ARE UNSURE OF ITS OPERATION

PLEASE DO NOT RETURN TO THE STORE
